Data Item PHTP Phone Number Type | Tipo de Nº
A user defined code (01/PH) that indicates either the location or use of a phone number. For example, you might set up phone types such as fax, cellular, home, home emergency contact, work emergency contact, and so on.
Es un código (01/PH) definido por el usuario que indica la ubicación o el uso de un número de teléfono. Por ejemplo, podría configurar tipos de teléfono, como pueden ser fax, teléfono celular, del domicilio, de contacto en domocicilio para emergencias, de contacto laboral para emergencias, etc.

Glossary Titles (Alpha Descriptions)
Es el código de identificación que requieren algunas autoridades fiscales. Puede ser el número de seguro social, el número de identificación fiscal federal o estatal, el número de impuestos sobre ventas, etc. No introduzca caracteres separadores. El sistema verifica el número e imprime los separadores en su formato correcto, de acuerdo con el valor de TAXC(Codigo de persona fisica a jurídica). Si no existe un valor para TAXC, el sistema usa la Entidad corporativa.
Atención usuarios de Cuentas por pagar: el registro Maestro de proveedores proporciona el valor implícito para la indentificación fiscal del procesamienta de la forma 1099.

Glossary
The indentification code required by various tax authorities. This can be a social security number, federal or state corporate tax ID, sales tax number, and so on. Do not enter separator characters. The system verifies the number and prints the separators in their correct format, according to the value of TAXC (Person/Corporation Code). If there is no value for TAXC, the syste, uses the Corporate Entity.
Attention Accounts Payable users: The supplier master record supplies the default value for the tax ID for 1099 Processing.
3008
Es el código de identificación que requieren algunas autoridades fiscales. Puede ser el número deseguro social, el número de identificación fiscal federal o estatal, el número de impuestos sobre ventas, etc. No introduzca caracteres separadores. El sistema verifica el número e imprime los separadores en su formato correcto, de acuerdo con el valor de TAXC(Codigo de persona fisica a jurídica). Si no existe un valor para TAXC, el sistema usa la Entidad corporativa.
Atención usuarios de Cuentas por pagar: el registro Maestro de proveedores proporciona el valor implícito para la indentificación fiscal del procesamienta de la forma 1099.
